

NBAQG October 2020 Workshop Designing and Fitting Borders

Jackie will be providing a “NO Sewing Machine Workshop” with tips, tricks, and lots of ideas for designing and fitting borders. The workshop will include a PowerPoint, demos and handouts with information on many topics including: determining border unit sizes, calculating and using spacer strips, matching corners for stripes, using border fabric, using repeated designs in fabric, calculating mitered borders (single and multiple), ideas for non-typical borders, tips for applying borders to your quilt center and tips for making your borders square. As time allows, students will work on design ideas for their own quilt and brainstorm with other members of the class.

Supply List:

- A top needing a border!
- Pen or pencil and note paper
